

West Devon Borough Council Construction Work

We apologise for any inconvenience you may have suffered when visiting these offices. The disturbance is due to a £3.9 million self-financing business project, which will see new offices to rent, improved meeting areas for the community and a 'one-stop shop' for West Devon people.

We are building two separate two-storey extensions. One extension will be a commercial rental block bringing more employment opportunities to West Devon. The other extension will include several new meeting areas, which will provide flexible and up to the minute facilities for the community and a first-rate conference venue. You can view a presentation of the project in reception.

Business as usual

We have provided designated visitor spaces in the car park. While the Council Chamber is being redeveloped Council meetings are being held in Hatherleigh Community Centre and Meldon Village Hall.

New Reception Area

The new build will transform the Borough Council's reception into a one-stop shop and a small area of offices is being provided alongside so that Council officers are readily available to the public.

New Council Chamber & NHS Dentist

The new Council Chamber will have a dual purpose as a conference centre which will bring new visitors to West Devon and benefit the local economy. The old Council Chamber will be adapted for use by an NHS Dentist, which will provide a much needed service to the Community.

Sustainable Features

The development will include sustainable and energy efficient measures

Solar panels
Situated on the roof these will create clean energy.

Interior fittings
Energy efficient fittings further reduce energy consumption.

Gas Boiler
An innovative gas boiler will recover and re-use wasted heat.

Rainfall collection
Rain water will be collected and recycled for toilet facilities.
